Profile

Experienced Full Stack Developer and IT Support with 5 years in the IT industry, including over 4 years as a Full Stack Developer and 6 months as a IT Support.Proven expertise in designing and developing scalable web and desktop applications. Strong knowledge of both frontend and backend development, customer support, and cloud technologies. Committed to delivering user-focused solutions and maintaining high code quality standards.

Expertise

- IT Support
- Full Stack Developer

Language

English : Intermediate

Japanese : Basic (preparing for JLPT N3,planned Dec 2026)

Education

- University of Computer Studies, Taungoo (2013-2019)

Work Experience

2022 - 2026

Index Net Solution Co., Ltd

Full Stack Developer

- Conducted user interviews and requirement gathering to developed and maintained web applications using Angular, ASP.NET Core Web API and MSSQL .
- Built and enhanced Windows desktop applications with Windows Forms App.
- Integrated FastReport, RDLC, Pdfmake and Excel Export for dynamic report generation.
- Designed and implemented cross-platform native applications using MAUI and Xamarin.
- Collaborated with teams for continuous improvement and optimization. Handled code versioning and deployment via Azure Devops and GitHub.
- Integrated third-party REST APIs and implemented webhooks to handle events and data synchronization

Technical Skills

- **Languages & Frameworks** : Angular, HTML, jQuery,Bootstrap, css, scss, Material,JavaScript, Typescript, C#, ASP.NET Core,Syncfusion, Web API, MVC, Windows Forms App, Entity FrameworkCore, Hangfire, Azure Function, PWA, Xamarin, MAUI,FastReport, RDLC, Pdfmake ,Excel Export And Unit Testing.
- **Database** : MySQL, PostgreSQL.
- **Version Control** : GitHub and Azure Devops.
- **Web Service** : Restful API, Postman,Swagger and Scalar API .
- **Hosting and Domain** : IIS, SmarterASP.Net, MyASP.NET, Azure Cloud and AWS.

Functional Skill Set

- Quick Learning
- Strong Problem-Solving & Debugging Skills
- Customer Support & Requirement Gathering
- Collaboration & Communication with Stakeholders

Projects

Bar POS

- Developed order management and invoice processing features.
- Technologies : ASP.NET Framework MVC, Xamarin, MSSQL and IIS.

PSW Terminalfor Oil

- Developed a web-based application to manage terminal operations, including oil inventory, imports, and logistics. Implemented Angular, Syncfusion, HTML , Jquery ,Bootstrap, CSS, Typescript for the front-end, ASP.NET Web API for the back-end, Hangfire and MSSQL for data storage
- Deployed the application on-premises with lIS and managed deployments via Azure Devops.

Warehouse Management System (WMS)

- Designed and implemented a system for tracking inventory, managing orders, and streamlining warehouse processes.
- Technologies : Angular,HTML ,Syncfusion,Jquery ,Bootstrap,CSS,Typescript, ASP.NET Core Web API, MSSQL, Azure Cloud Services, Azure Devops And GitHub.

eVisa MyanmarWebsite V3

- Created a web application for managing eVisa applications v3, applying visa processes.
- Technologies : Angular,HTML ,syncfusion,Jquery ,Bootstrap,CSS,Typescript for front-end, ASP.NET Core Web App MVC(Control User app),ASP.NET Core Web API (back-end), MSSQL,Hang fire and Azure Devops.
- · Reference link is https://evisa.moip.gov.mm/

Inland Container Depot Management System(ICD) V3

- Developed and managed Gate In, MNR, EDI, and Gate Out processes.
- Implemented Auto EDI for automated data exchange.
- Integrated external systems using REST APIs and Webhooks.
- Technologies : Angular,HTML ,Syncfusion,Pdfmake,Jquery ,Bootstrap,CSS,Typescript,Material for front-end, MAUI,PWA(Mobile app),ASP.NET Core Web API (back-end), MSSQL,Azure Cloud,Azure function and Github.

TMS Gate Terminal System

- Developed a multi-project system for gate operations, weight bridge, and documentation.
- Technologies: Angular,HTML ,Syncfusion,Jquery ,Bootstrap,CSS,Typescript for front-end, ASP.NET Core Web API , Windows Forms App (.NetFramework), MSSQL, GitHub.
- Modules include TMS_ Web (documentation and reporting), TMS_Gate(gate processes), TMS_Weight (weight bridge), and TMS_Api(common back-end logic).

UP Bus Transport System

- Developed daily trip planning and transport operation management.
- Managed trip expenses, income, and operational costs.
- Technologies: Angular,HTML ,Syncfusion,Jquery ,Bootstrap,CSS,Typescript for front-end, ASP.NET Core Web API , MSSQL, GitHub, Smarter and AWS.

Charter Flight System

- Built a web-based system to manage charter flight ticketing workflows including planning, booking, ordering, invoicing, and reporting functionalities.
- Technologies: Angular,HTML ,Syncfusion,Pdfmake,Jquery ,Bootstrap,SCSS,Typescript, ASP.NETCore WebAPI, MSSQL, Azure Cloud Services and GitHub.

Fixed Asset Management System

- Developed asset transfer, work order, check-in, check-out and depreciation calculation management features.
- Technologies: Angular, HTML ,Syncfusion, Pdfmake,Jquery ,Material,SCSS,Typescript, PWA, ASP.NETCore WebAPI, MSSQL, Azure Cloud Services and GitHub.

UP Staff Message System

- Developed staff messaging and communication features. Implemented Cloud In/Out tracking and management.
- Technologies: Angular, HTML ,Syncfusion, Pdfmake, Jquery ,Material, SCSS, Typescript, PWA, ASP.NETCore WebAPI, MSSQL, Azure Cloud Services and GitHub.

Inland Container Depot Management System(ICD) V4

- Developed a unified digital platform using a mobile-first approach for both Web and Mobile PWA.
- Implemented Gate In, MNR, EDI, Auto EDI, and Gate Out workflows.
- Integrated external systems using REST APIs and Webhooks.
- Designed responsive and user-friendly interfaces across Web and Mobile platforms.
- Technologies : Angular,HTML ,Syncfusion,Pdfmake,SCSS,Typescript,Material, PWA for front-end,ASP.NET Core Web API (back-end), MSSQL,Azure Cloud and Github.
